

PROJECT PROPOSAL ON AGRI-TOURISM

Corporate Finance ISA

PROJECT PROPOSAL ON AGRI-TOURISM

“MAMACHI VADI”

1. Executive Summary

Goa, India’s premier tourist destination, is celebrated for its beaches, culture, and heritage. In recent years, the state has focused on promoting sustainable and experience-based tourism, moving beyond coastal attractions to highlight its hinterlands, backwaters, and biodiversity. The Goa Tourism Master Plan aims to position the state as a year-round responsible tourism destination, blending growth with environmental care.

Eco-tourism in Goa emphasizes conservation and community welfare through low-impact travel experiences like trekking, bird watching, and visits to sanctuaries.

A key offshoot, agri-tourism, connects visitors to rural life and traditional farming. Tourists participate in activities such as rice cultivation, toddy tapping, and spice farming, fostering cultural exchange and supplementing farmers’ incomes.

Mamachi Vadi is an innovative agri-tourism venture offering immersive 3 - 5 day farm stays in a peaceful Goan hamlet (Choroa Island) where guests experience authentic rural life by participating in daily agricultural activities, celebrating village festivals, and engaging with farming families. This venture creates deep, family-like connections through participatory experiences in nature, farming, and Goan traditions, differentiating itself from conventional tourism by providing genuine community integration rather than surface-level sightseeing.

Project Economics:	
Total Investment:	Rs 64,00,000
Financing:	75% Debt (Rs 48,00,000), 25% Equity (₹16,00,000)
IRR:	46.25%
Payback Period:	3 Years 10 months 4 days
WACC:	13%
NPV (at 13%):	Positive over 10-year period
Project Duration:	10 years

2. SECTION A: STARTUP IDEA

Business Name: Mamachi Vadi

Tagline: *Experience Goa, the Family Way*

Concept Description:

A peaceful Goan hamlet where guests live like family, working on farms, celebrating village festivals, and experiencing the true spirit of Goa. Mamachi Vadi offers immersive 3 - 5 day farm stays that connect tourists with nature, Goan traditions, and the warmth of rural hospitality.

Product/Service: Premium immersive cultural agri-tourism experiences combining:

- 3 - 5 day farm stays on a 5-acre working farm in Chorao, Goa
- Direct participation in agricultural activities (farming, harvesting, organic cultivation)
- Living like family (cooking, crafts, daily routines)
- Celebration of village festivals, temple ceremonies, and local traditions
- Authentic Goan village life experiences with emphasis on family warmth and hospitality
- Educational programs on sustainable farming and indigenous agricultural knowledge
- Participation in real community events (weddings, celebrations)
- Cooking classes featuring authentic Goan seafood and vegetarian recipes using farm-fresh ingredients
- Stargazing nights by the fields with storytelling, folk music, and local desserts

Business Model: Partnership/LLP, catering to an average of 30 day visitors and 15 overnight guests per day during a 240-day annual operating period(October - May). The venture functions as a family-oriented cultural and agri-tourism retreat, offering guests an immersive Goan village experience that emphasizes human connection, community living, and cultural exchange.

Why This Business Is Good and Needed

1. **Growing Demand for Authentic, Family-Oriented Experiences:** Urban families increasingly seek meaningful, transformative travel that builds connections rather than just consuming attractions. Mamachi Vadi addresses this through genuine family integration and community belonging.
2. **Gap in Goa's Tourism Market:** While Goa attracts millions of visitors annually for beaches and nightlife, it lacks structured family-oriented immersive cultural-agricultural experiences that emphasize warmth, hospitality, and belonging. Most competing offerings provide short tours; Mamachi Vadi offers extended stays with deep family integration.
3. **Increasing Interest in Sustainable and Organic Agriculture:** Health-conscious urban families are increasingly drawn to organic produce, sustainable farming practices, and authentic connections with rural communities. The term “**Mamachi**” (meaning maternal uncle in Konkani) embodies warmth, care, and familiarity, reflecting the trust and hospitality that Indian families associate with their maternal homes.
4. **Economic Support for Rural Families:** The project directly generates supplementary income for farming families, helping preserve traditional agricultural practices and rural livelihoods while offering authentic cultural exchange on family terms rather than commercial basis.
5. **Cultural Preservation Through Family Bonds:** By positioning the experience as "living like family," Mamachi Vadi enables tourists to participate in genuine local festivals, ceremonies, and celebrations while helping preserve Goan cultural heritage and indigenous knowledge systems that might otherwise be lost.
6. **Wellness and Mental Health Benefits:** Families increasingly seek retreats that reduce screen time, rebuild family bonds, and provide peace. Mamachi Vadi's family-centered approach addresses these wellness trends with authentic nature immersion and intergenerational cultural exchange.

Unique Story and Differentiation

Why "Mamachi Vadi"?

The name Mamachi (maternal uncle-Mama in Konkani language) deliberately evokes warmth, tradition, and family care. "Vadi" refers to a hamlet or settlement. Together, Mamachi Vadi

suggests a place where you're welcomed not as tourists but as family with the same hospitality, care, and traditional wisdom a maternal uncle's home provides.

Traditional Agri-Tourism vs. Mamachi Vadi:

Aspect	Traditional Agri-Tourism	Mamachi Vadi
Duration	Day visits or weekend stays	Day visits and 3-5 day immersive programs
Emotional Connection	Commercial transaction	Family-like integration
Participation Level	Passive observation	Active participation as a family member
Experience Frame	Guest at facility	Family member in home
Cultural Access	Limited to scheduled tours	Full participation in real family life
Group Dynamics	Larger groups	Small, personalized family-sized groups
Service Approach	Staff–guest hierarchy	Host–family-member relationship
Learning	General agriculture introduction	Deep knowledge shared by “family” members
Target Market	Generic tourists	Families seeking belonging and connection

Why Mamachi Vadi Is Unique:

Unlike competitors offering cultural walking tours or standard agri-tourism farms, Mamachi Vadi provides:

- **Family Integration:** Tourists live as family members, not paying guests, sharing meals, daily chores, decisions, celebrations
- **Multi-Generational Connection:** Grandparents, parents, and children experience cultural transmission together

- **Authentic Participation:** Real festivals and ceremonies, not performances; genuine farm work, not demonstrations
- **Emotional Bonding:** Extended stays enable deep relationships with families and village community
- **Wisdom Exchange:** Learn traditional practices directly from elders who have preserved them for generations
- **Cultural Preservation:** Tourism facilitates the transmission and safeguarding of authentic family traditions across generations.

The Concept Behind Mamachi Vadi:

Modern urban families are increasingly disconnected from nature, agriculture, cultural roots, and extended family structures. Mamachi Vadi addresses this by recreating the warmth, wisdom, and togetherness that multi-generational joint families traditionally provided, but now in an immersive, intentional cultural retreat where urban families reconnect with traditions and each other while supporting rural farming families.

Practical Implementation:

- Small groups (6-10 people) per stay
- Shared accommodation in farm tents designed for family living
- Participation in all daily activities (cooking, farming, celebrations)
- Meals prepared collectively using farm produce
- Evening gatherings for storytelling and cultural exchange
- Festival participation planned around village calendars
- Minimal commercial hierarchy; emphasis on mutual exchange and respect

Differentiation

Typical Market Offerings: Short cultural walking tours through heritage sites

Mamachi Vadi: Extended immersive family stays with authentic farm work and real community participation

Typical Market Offerings: Curated heritage trails and guided tours

Mamachi Vadi: Living as family members in working farms and participating in daily life

Market Positioning:

- Premium market segment seeking authentic family experiences and cultural roots
- Urban families wanting to preserve heritage and teach children traditional values
- Multi-generational travelers (grandparents, parents, and children together)
- Young adults seeking meaningful getaways that blend culture, nature, and community life
- Professionals seeking wellness retreats with deep human connection
- Culturally-conscious tourists desiring responsible, community-supportive travel
- Indian/Goan diaspora reconnecting with homeland and traditional ways

SECTION B: CASH FLOW ANALYSIS

1. Selling Price Justification (Market Research)

Day Package Pricing: Rs 500 per person

Agent Commission (20%): Rs 100 per booking

Revenue : Rs 400 per person

The package is priced at ₹500 per person, with a 20% agent commission (₹100), leaving a net revenue of ₹400 for Mamachi Vadi. This pricing ensures affordability for guests, fair incentives for agents to promote the experience, and adequate margins to cover costs while building brand awareness in the initial years.

Market Research Justification:

- Comparative analysis of similar agri-tourism farms in Maharashtra and Goa: ₹500–₹1,000 range
- Premium experiential tourism in rural areas: ₹850–₹1,500 range
- Family-oriented agri-tourism experiences with authentic cultural participation: ₹1,000–₹1,400 range
- Mamachi Vadi's day package includes a 4–5 hour farm experience with local Goan meals, agricultural participation, traditional games, cultural activities, and a warm family-style welcome.

- Initial pricing of ₹500 (Years 1–5) ensures affordability and accessible market entry for early brand recognition.
- As brand awareness and customer loyalty grow, the price increases to ₹600 (Years 6–10) to align with rising demand, enhanced experiences, and market inflation trends.
- The price progression reflects value-based pricing, maintaining competitiveness while enhancing perceived premium quality through improved facilities and curated experiences.

Annual Capacity & Revenue (10-Year Trend):

- Operating Days: 240 days annually
- Day Guests: Grows from 30 guests/day in Year 1 to 70 guests/day by Year 10
- Annual Day Package Revenue: Rs 17.28 lakh in Year 1 – Rs 68.54 lakh in Year 10

Night Stay Pricing: Rs 3000 per person per night

Agent Commission (20%): Rs 600 per booking

Revenue : Rs 2400 per person

Market Research Justification:

- Comparable overnight agri-tourism stays in similar regions are priced between Rs 4,000 – Rs 4500 per night.
- Premium family-oriented farm stays offering cultural and experiential immersion are priced around Rs 4,000 – Rs 5,000 per night.
- Mamachi Vadi's pricing at Rs 3,000 offers exceptional value through:
 - Family-style accommodation in a serene Goan farmhouse setting
 - Three organic farm-to-table meals
 - Hands-on farming and traditional craft experiences
 - Goan cultural celebrations and personalized hospitality
- A steady rate of Rs 3000 per night is maintained for the first five years, followed by an increase to Rs 3500 per night in the subsequent five years, reflecting gradual price growth in line with enhanced facilities and brand value.
- This pricing strategy ensures affordability, consistent occupancy, and long-term repeat visitation, while maintaining premium positioning targeted at families, young

adults, and diaspora travelers seeking authentic rural comfort and meaningful connections.

Annual Capacity & Revenue (10-Year Trend):

- Operating Days: 240 days annually
- Night Guests: Expands from 15 guests/day in Year 1 to 29 guests/day by Year 10
- Annual Night Stay Revenue: Rs 51.84 lakh in Year 1 to Rs 165.64 lakh in Year 10

Annual Operating Period: 240 days (weekends and holidays + peak tourist seasons: October-May)

Revenue Projections (10 Years)

Year	Operating Days	Expected Occupancy	Day Guests (per day)	Day Package Rate (₹)	Day Package Revenue	Night Guests (per day)	Night Stay Rate (₹)	Night Stay Revenue	Total Annual Revenue
			Day Packages			Overnight Packages			
1	240	60%	30	400	1728000	15	2400.00	5184000	6912000.00

10	240	85%	70	480	6854400	29	2800.00	16564800	23419200.00
			476	4400	39402240	210	26000	101409600	140811840.00

Financial performance and growth over time.

- Over the 10-year period, the project's revenue shows consistent year-on-year growth driven by improved occupancy, operational efficiency, and repeat visitors. With brand awareness and partnerships expanding, overall revenue rises from ₹69.1 lakhs in Year 1 to approximately ₹2.34 crores in Year 10.
- Across the full projection period, day packages contribute around ₹3.94 crores, while overnight stays generate ₹10.14 crores, resulting in a cumulative revenue of ₹14.08 crores.
- Around 72% of total income is derived from overnight accommodation, confirming that extended-stay experiences are the major revenue source and long-term value driver for the project.

2. Cost Structure and Projections

Annual Operating Costs (Year 1 Baseline)

Cost Category	Annual Amount (₹)	Justification
Food (Day + Night)	14,40,000	Based on average of ₹100 per day guest and ₹200 per night guest; includes authentic Goan meals using organic farm produce.
Lease Rent	9,60,000	₹80,000 per month per acre (1-acre lease). Fixed annual cost.
AMC (Annual Maintenance Contract)	3,20,000	Regular servicing of solar panels, irrigation systems, equipment, and minor infrastructure upkeep.
Staff & Labour (Seasonal – 8 months)	80,000	Farm helpers, caretakers, and seasonal support during the tourist period.

Permanent Staff Cost	9,00,000	Salaries for full-time staff managing operations, hospitality, and guest coordination.
Utilities & Administration	2,40,000	Electricity, water, internet, administrative expenses, and maintenance supplies.
Marketing & Other Operations	5,00,000 (reducing to ₹3,00,000 in Year 3, from Year 4 to 150000)	Promotional campaigns, online listings, event collaborations, and customer engagement initiatives.
Total Annual Operating Cost (Year 1)	₹44,40,000	Includes both fixed and variable operating expenses.

Cost Projection

- Variable costs (Food/CoG) increase annually by 10%, reflecting inflation and higher occupancy.
- Fixed costs (Lease, AMC, Utilities, Staff) remain mostly stable with minor inflation adjustments.
- Marketing & promotional costs gradually reduce post–Year 3 as brand visibility and organic reach improve.
- Total Operating Cost rises from Rs 44.4 lakh in Year 1 to Rs 60.45 lakh in Year 10, reflecting natural business growth and capacity expansion.

Out of the total 5 acres of land, the main infrastructure and development work will be carried out on about 4,000 sq. meters (around 1 acre). This area will include the core spaces such as accommodation units, the dining area, and activity zones for guests. The remaining 4 acres will be owned by local farmers who will be our collaborators. These farms will be a part of the overall agri-tourism experience, where visitors can take part in real farming activities and understand local agricultural practices. The produce grown by these farmers will also be promoted and sold through Mamachi Vadi, giving them better market access and fair income opportunities.

This collaboration helps the project stay connected to the community while supporting local livelihoods and sustainable rural development.

Financing Costs

Interest calculations based on:

- Term Loan (Agri-Tourism Project): Rs 48,00,000 at 15% per annum
- Repayment Schedule: 10 years, with moratorium period

Capital Structure

Source	%	Cost
Debt	75	15% (Kd)
Equity	25	8.04% (Ke)

Depreciation:

Depreciation has been computed using the Straight-Line Method (SLM) on fixed assets such as farm buildings, family accommodations, and equipment.

- Depreciation Rate: 10% per annum
- Depreciation Schedule: Year 1–10 (constant ₹6,40,000 per year)
- Non-cash expense therefore, it is added back in the cash flow statement to arrive at Net Annual Cash Flow.

Cash Flow After Tax Calculation

Formula Used:

Profit Before Tax = Total Revenue - Operating Costs - Interest - Depreciation

$$\text{Tax (30\%)} = \text{PBT} \times 30\%$$

$$\text{Profit After Tax} = \text{PBT} - \text{Tax}$$

$$\text{Net annual Cash Flow} = \text{PAT} + \text{Depreciation}$$

10-Year Cash Flow

Projected Profitability & Cash Flow Table (10 Years)

Year	Cash Inflow	Less Operating Cost	EBITDA	Less Depreciation	EBIT	Interest	EBT	Less: Tax @30%	PAT	ADD: Depreciation	Net Annual Cash Flow
0											-6,400,000.00
1	6912000.00	4440000.00	2472000.00	640000.00	1832000.00	720000.00	1112000.00	333600.00	778400.00	640000.00	1,418,400.00

8	18785280.00	5456152.62	13329127.38	640000.00	12689127.38	720000.00	11969127.38	3590738.21	8378389.16	640000.00	9,018,389.16
9	21689280.00	5736767.89	15952512.11	640000.00	15312512.11	720000.00	14592512.11	4377753.63	10214758.48	640000.00	10,854,758.48
10	23419200.00	6045444.68	17373755.32	640000.00	16733755.32	720000.00	16013755.32	4804126.60	11209628.73	640000.00	11,849,628.73

Projected Profitability & Cash Flow

- The project will generate revenue from Year 1, generating ₹14.18 lakh in net cash flow even after paying interest and taxes.
- Revenues and profits will grow steadily each year as guest numbers increase, demand builds, and prices are gradually adjusted after Year 5.
- PAT is expected to grow more than 10 times from ₹7.78 lakh in Year 1 to ₹1.12 crore by Year 10, reflecting strong compounding profitability.
- Net annual cash flow will rise sharply from ₹14.18 lakh to ₹1.18 crore, indicating strong internal cash generation and low dependence on external funding.

- From Year 6 onwards, higher pricing and efficient operations will further increase margins, moving the project into a high-return phase.
- Corporate tax rates taken as 30% consistently.

SECTION C: WEIGHTED AVERAGE COST OF CAPITAL (WACC)

Capital Structure

Total Investment Required: ₹64, 00,000

Project Financing Structure

Funding Source	Amount	Percentage
Equity (Margin Money / Personal Investment)	₹1600000	25%
Debt (Bank Term Loan)	₹4800000	75%
Total Project Funding Requirement	₹6400000	100%

WACC Calculation

Cost of equity calculation	
Industry Beta	0.6805263158
Industry Debt to Equity	1.219666667
Unlevered Beta	0.3671046243
Levered Beta (Mamachi Vadi)	1.138024335
Cost of Equity	8.036170348

WACC calculation	
Expect Market Return=14%) NIFTY	

Risk Free Return= 7%	
Kd	15%
Ke	8.04%
Debt	75%
Equity	25%
WACC(Cost of Capital)	13%

To determine the project's cost of financing, the Weighted Average Cost of Capital (WACC) is calculated using both the cost of equity and cost of debt components. For the analysis I used the average industry debt-to-equity ratio which is 1.22, meaning 75% of financing comes from debt and 25% from equity. The industry beta is estimated at 0.68, which is adjusted (unlevered and relevered) to derive a levered beta of 1.14 for the project.

Using the Capital Asset Pricing Model (CAPM) formula:

$$K_e = R_f + \beta(R_m - R_f)$$

where the risk-free rate (R_f) is 7% and the expected market return (R_m) is 14%.

The cost of debt (K_d) is assumed at 15%. With the weighted capital structure (Debt 75%, Equity 25%), tax rate is taken as 30%, the calculated WACC (Weighted Average Cost of Capital) is 13%. This WACC will serve as the discount rate for further evaluation using NPV and IRR analysis.

SECTION D: FINAL VALUATION & INVESTMENT APPRAISAL

CoC	13%
Net Annual Cash Flow	PV
-6,400,000.00	
1,418,400.00	1252350.34
1,680,480.00	1310049.11
2,999,840.00	2064806.86
3,453,272.00	2098646.27

4,320,387.20	2318239.17
6,521,445.92	3089630.76
8,121,762.51	3397348.38
9,018,389.16	3330779.50
10,854,758.48	3539681.53
11,849,628.73	3411739.65
PV	25813271.56
II	-6400000.00
NPV	19413271.56
IRR	46.25%
Profitability index	4.033323682

The Capital Budgeting outcomes clearly indicate that the project is financially viable, profitable and generates strong long-term value. The project shows a Net Present Value (NPV) of ₹1.94 Crores, which means that after discounting all future inflows at the cost of capital (13%), the project still adds positive wealth to the investors. A positive NPV of this magnitude strongly supports accepting the project.

The Internal Rate of Return (IRR) is 46.25%, which is considerably higher than the cost of capital (13%). This indicates that the project yields returns significantly above the minimum required rate and therefore offers excellent financial attractiveness and investment efficiency.

The Profitability Index of 4.03 further confirms that for every ₹1 invested, the project creates approximately ₹4.03 of present value benefit, which reflects a very high capital productivity ratio.

Payback Period Calculation

Net Annual Cash Flow	PV	Cumulative PV
-6,400,000.00		
1,418,400.00	1252350.34	1252350.34
1,680,480.00	1310049.11	2562399.44
2,999,840.00	2064806.86	4627206.30
3,453,272.00	2098646.27	6725852.57

4,320,387.20	2318239.17	9044091.74
--------------	------------	------------

Investment recovered between Year 3 and Year 4 because:

- Cumulative PV at Year 3=4,627,206.30 <6,400,000
- Cumulative PV at Year 4=6,725,852.57 >6,400,000

Amount remaining to recover after Year 3

- Remaining Investment=6,400,000–4,627,206.30=1,772,793.70

Discounted Cash Flow in Year 4

- PV of Year 4 cash flow=2,098,646.27

Fraction of Year to recover remaining investment

- Fraction of year = remaining investment/ PV of year 4 cash flow

$$= 1772793.70 / 2098646.27$$

$$=0.84$$

- In months = 0.84*12= 10.13 months
- **Payback period is 3 years 10 months and 4 days**

In terms of risk recovery, the investment is recovered within 3 Years 10 months and 4 days . This is a strong indicator that the recovery period is fairly short relative to a 10-year horizon, reducing long-term risk exposure and increasing project stability. Based on the cumulative PV approach, the project takes 3 Years to recover almost the full investment amount, and the remaining unrecovered balance (₹1,772,793.70) is recovered in the next year's cash flows. Initial investment is recovered in approximately 3 years and 10 months.

Overall, the results show that the project is financially sound. It has a high IRR, positive NPV, a good profitability index, and a short payback period. This means the project is expected to recover its investment quickly and earn steady profits over time, showing that it is financially strong and sustainable

Conclusion

The Mamachi Vadi agri-tourism project is financially sound and strategically well-planned, addressing the rising demand for authentic, family-oriented farm experiences in Goa. The financial analysis highlights strong viability and sustainable long-term potential.

The project shows a Net Present Value (NPV) of ₹1.94 crores at a 13% discount rate, indicating significant value creation. The Internal Rate of Return (IRR) of 46.25% is much higher than the cost of capital, showing strong profitability. A Profitability Index (PI) of 4.03 suggests that each rupee invested generates about four rupees of benefit, while the payback period of 3 years, 10 months, and 4 days reflects quick capital recovery within the 10-year horizon.

The revenue projection indicates consistent growth from ₹69.1 lakhs in Year 1 to about ₹2.34 crores by Year 10 mainly driven by higher occupancy, better pricing, and operational efficiency. Around 72% of total income comes from overnight stays, confirming it as the main revenue source. Profit After Tax is expected to grow from ₹7.78 lakh to ₹1.12 crore, showing strong and steady financial performance.

Strategically, Mamachi Vadi bridges a key gap in Goa's tourism by offering immersive 3–5 day stays focused on cultural connection, wellness, and community engagement. Its collaboration with local farmers ensures authenticity and rural livelihood support, aligning with Goa's Tourism Master Plan for sustainable and responsible tourism. Overall, the project is financially feasible, culturally enriching, and socially beneficial, reflecting strong profitability, low risk, and long-term sustainability.
